(Currency unit is represented by VND unless it is noted by other currency)

than 3 months from the date investment, has high liquidity, can be converted easily into a certain amount of cash and there is no risk in conversion into cash at the date of reporting.

5.2. Principles of recording financial investments

As investments outside the enterprise to use of capital reasonably as to raise operational efficiency of company: investments in subsidiaries, associated companies, joint ventures, securities investment, and other financial investments, etc.

Classify investments when preparing financial statements according to the following principles:

- Investments with a remaining maturity of less than 12 months or within 1 production and business cycle are classified as short-term.
- Investments with a remaining maturity of more than 12 months or more than 1 production and business cycle are classified as long-term.

Trading securities:

The value of securities and other financial instruments held for trading purposes (waiting for increase in price to sell for profit). Trading securities include:

- Shares, bonds listed on securities market;
- Securities and other financial instruments as commercial papers, forward contracts, swap contracts, etc."

Trading securities must be recorded according to original prices. The trading securities shall be recorded when the investors acquire ownership.

The dividends paid in the period before investment date shall be recorded as a decrease in value of investment. When the investor receives additional shares without paying money to joint-stock companies using share premium, the other funds belong to owners' equity or pay dividends in shares, the investor only observes the quantity of additional shares.

Before any share is exchanged, its value must be determined according to fair value on the exchanging date.

When liquidating or transferring trading securities, the cost price shall be determined according to mobile weighted average method, for every type of security.

- **Provision for decline in value of trading securities:** The company may create provision for the probable impairment loss if it is evident that the market value of held for sale securities of the enterprise decline against the book value. The creating or reverting of allowance for decline in value of trading securities shall be carried out at the time in which the financial statement prepared and recorded in financial expenses during the period.

Held-to-maturity investments

These investments do not reflect bonds and debt instruments which are held for trading purpose. Held-to-maturity investments include term deposits (maturity more than 3 months), treasury bills, promissory notes, bonds, preference shares which the issuer is required to re-buy them in a certain time and held to maturity loans to earn profits periodically and other held-to-maturity investments.

Provision for devaluation of held-to-maturity investment

If the reserve of held-to-maturity investments has not been set up as prescribed by law, the Company must evaluate the recovery ability. Where there is a solid evidence that some or all of the investment may not be recoverable, the amount of losses must be recognized as financial expenses in the period.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS*(Currency unit is represented by VND unless it is noted by other currency)*

This provision or reversal is made at the time of preparing the financial statements. Where the amount of losses cannot be reliably determined, it is not recorded as a decrease in investment but disclosed about the recoverability of the investments in the Notes to the financial statements.

Investments in subsidiaries, associated companies, joint ventures:

Investments in subsidiaries, associated companies are accounted under the cost method. Net profits distributed from subsidiaries, associated companies arising after the date of acquisition are recognized in the Income Statement. The other distributed amounts (other than net profit) is considered a recovery of investment and are recorded as deductions investment cost.

As to joint venture activity in the form of business activities jointly controlled and in the form of jointly controlled assets, Company applies the general accounting principles as other normal business activities. In which:

- The company must separately monitor income, expenses related to joint venture activity and allocate to the parties in the joint venture under the joint venture agreement.
- The company separately monitor the assets contributed to the joint venture, the capital contributed to jointly controlled assets and the general liabilities, individual liabilities arising from joint ventures. Expenses directly related to investment activities in joint ventures and associates are recorded as financial expenses in the period.

Investments in equity instruments of other entities

These are investments on equity instruments of other entities without having neither controlling, jointly controlling right nor significant influence over the investee.

Provision for investments: Provision of the investment is made when there are reliable evidences of the diminution in value of those investments at the balance sheet date. Increases and decreases to the provision balance are recorded as finance expense in the separate income statement.

5.3. Principles of recording inventories

Inventory Valuation Principles: Inventories are stated at historical cost. Where the net realizable value is lower than historical cost, inventories must be recorded at net realizable value. The cost of inventories comprise all costs of purchase, costs of conversion and other directly relevant costs arised in bringing the inventories to their current locations and conditions.

The cost of externally purchased inventories includes the purchase price, non-refundable taxes, transportation, handling, storage costs incurred during the purchase process, and other costs directly attributable to the acquisition of inventories.

The cost of inventories produced internally by the entity includes direct material costs, direct labor costs, fixed production overheads, and variable production overheads incurred during the conversion of materials into finished goods.

Costs excluded from the historical cost of inventories are:

- Trade discounts and discounts on purchased goods due to improperly purchased goods and quality.
- Cost of raw materials, labor costs and other production and business expenses incurred above the normal level.
- Cost of inventory preservation excluding the cost of inventory preservation necessary for the next

NOTES TO THE SEPARATE FINANCIAL STATEMENTS*(Currency unit is represented by VND unless it is noted by other currency)*

production process and the cost of inventory preservation incurred during the purchase process.

- Selling expenses.
- General and administrative expenses.

Method of determining inventories costs at the end of the period: The cost of inventories at the end of the period is calculated by weighted average method.

Method of accounting inventories: The Company applies the perpetual declaration method to account for inventories.

Provision for obsolete inventories: The amount of provision for devaluation of inventories is made equal to the difference between the historical cost of inventories and their net realizable value.

5.4. Principles of recording trade receivables

All receivables must be recorded in detail by aging, by each client and in original currency and other details depending on the management request of the Company.

The classification of receivables must be managed as follows:

- Trade receivables: commercial receivable arising from trading activities between the Company and its buyers: selling goods, rendering services, disposal of assets, exported receivable of consigner through the consignee;
- Other receivables: receivables neither commercial nor relevant to trading activities.

For the preparation of financial statements, the receivables must be classified as follows:

- Having maturity not exceeding 12 months or 01 normal production period are recorded as short-term.
- Having maturity over 12 months or 01 normal production period are recorded as long-term.

Provision for doubtful debts: Provision for bad debts represents the expected loss of value of receivables that are likely to not be paid by customers for receivables at the time of reporting.

5.5. Principles for recording and depreciating fixed assets, investment properties**Principles for recording tangible fixed assets and intangible fixed assets, investment properties**

Tangible fixed assets, intangible fixed assets, investment properties are recorded at historical cost. During the using process, tangible fixed assets, intangible fixed assets, investment properties are tracked in detail at historical cost, accumulated depreciation or amortisation and net book value.

Historical cost of financial lease fixed assets are recognized at fair value of the leased properties or at present value of the minimum lease payment (in case the fair value is higher than the present value of the minimum lease payment) plus the initial costs directly related to the financial leasing activity.

The Company depreciates fixed assets, investment real estate into operation and production expense with those assets related to operation and production.

Depreciation method for tangible fixed assets, intangible fixed assets and investment properties: Depreciation and amortization are calculated on a straight-line method.

The useful life are estimated as follows:

- Buildings, structures 4-25 years

NOTES TO THE SEPARATE FINANCIAL STATEMENTS*(Currency unit is represented by VND unless it is noted by other currency)*

- Machinery, equipment	5-15 years
- Transportation equipments	5- 8 years
- Office equipment and managing furniture	10 years
- Intangible fixed asset is long-term land use right	49 years

5.6. Principle of capitalization of borrowing costs and other expenses

Principle of capitalization of borrowing costs: Borrowing costs that are directly attributable to the investment in the construction or production of a work-in-progress are included in the value of the asset (capitalized), including interest on the loan, allocation of discounts or premium when issuing bonds, additional costs incurred related to process of loan procedures.

Capitalization of borrowing costs will be suspended for periods during which investment in construction or production of a work-in-progress is disrupted, unless such interruption is necessary.

Capitalization of borrowing costs ends when substantially necessary activities for the preparation of the work-in-progress asset for its intended use or sale when it have been completed. Borrowing costs incurred will be recorded as production and business expenses in the period when incurred.

Income arising from the temporary investment of separate loans pending their use for the purpose of obtaining work-in-progress assets, must be deducted (-) from borrowing costs incurred when capitalizing.

Borrowing costs capitalized during the period must not exceed the total amount of borrowing costs incurred during the period. Loan interests and discount or premium allocations capitalized in each period must not exceed the actual interest incurred and the discount or premium allocations for that period.

Principle of capitalization of other expenses:

Principle of capitalization of prepaid expenses: Prepaid expenses allocated to investment in capital construction, renovation and upgrading of fixed assets during the period are capitalized into fixed assets being invested or renovated or upgraded.

Principles of capitalization of other expenses: Other expenses in service of investment in capital construction, renovation and upgrading of fixed assets in the period are capitalized into fixed assets being invested or renovated or upgraded.

5.7. Principles of recording prepaid expenses

The calculation and allocation of prepaid expenses to operating expenses for each accounting period must be based on nature and extent of each type of expenses to select appropriate and consistent method and criteria.

Each prepaid expense incurred shall be kept records in details, and allocated to objects subject to expenses of each accounting period and residual expenses, which have not been allocated to expenses

The prepaid expenses of great value to be allocated in the quarters, but with maturity less than 01 fiscal year, or within a normal production cycle they are recognized as short-term prepaid expenses, other expenses prepaid expenses over 12 months or over a normal production cycle is presented as long-term prepaid expenses.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

(Currency unit is represented by VND unless it is noted by other currency)

5.8. Principles of recording payables

Principle of recognition

All payables are monitored in detail by remaining payment term, by payable object, type of payable original currency and other details depending on the management request of the Company.

The classification of payables is made according to the following principles:

- Trade payables include commercial payables arising from transactions of purchases of goods, services, assets and payables when importing though consiger;
- Other payables include non-trade payable, not related to buying – selling transactions

Classification of payables when preparing the financial statements according to the following principles:

- Accounts payable with the remaining payment period not exceeding 12 months or within a production and business cycle are classified as short-term.
- Accounts payable with remaining payment period of more than 12 months or more than 1 business cycle are classified as long-term.

5.9. Principles of accrued expenses

Accrued expenses include those made for goods, sevicees received from suppliers in the accounting year but not yet paid due to the lack of receipts or supporting documents, are recognised as manufacturing and operating expense in the reporting year based on the term stated in the respective contract.

5.10. Principles of recording owner's equity

Owner's equity is stated at actually contributed capital of owners and monitored detailed each organization, individual to participate in contribution of capital.

When the investment license defining the charter capital of the enterprise is determined in foreign currency equivalent to an Vietnam dong amount, determining the contributed capital by investors in foreign currencies is based on the amount of foreign currency actually contributed.

In case of receipt of contributed capital in asset, owner's capital must be recorded an increase according to revaluated prices of assets accepted by capital contributors. Intangible assets such as brands, trademarks, trade names, rights of development of projects ... shall only be recorded an increase the contributed capital if relevant law provisions allow.

"For joint-stock company, contributed capital of the shareholders is recorded according to actual price of stock issuance, but is recorded in detail in two separate criterions:

- Contributions from owners are recorded according to par value of shares;
- Share premium shall record the difference between the par value and issue price of shares."

In addition, share premium shall record the difference between price of repurchasing of treasury stocks and the re-issue price of treasury stocks.

Option of conversion of bonds into shares arising when company issue bonds that can be converted into a certain number of shares shall be prescribed in issuance plan. The value of the capital component of the convertible bond is defined as the difference between the total sums received from

NOTES TO THE SEPARATE FINANCIAL STATEMENTS*(Currency unit is represented by VND unless it is noted by other currency)*

the issuance of convertible bonds and the value of the debt component of convertible bonds. At the time of initial recording, the value of stock options of convertible bonds is recorded separately in owner's capital. At the bond maturity, accountants shall record this option as capital stock premium.

Other capital shall record operating capital set up additionally from the result of business activities or given as gifts, presents, financing and asset revaluation (according to current regulations).

5.11. Principles of recording revenue

Revenue from sale of goods should be recognised when all the following conditions have been satisfied:

- The significant risks and rewards of ownership of the goods have been transferred to the buyer;
- The Company retains neither continuing managerial involvement as a neither owner nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- The economic benefits associated with the transaction of goods sold have flown or will flow to the Company;
- The costs incurred or to be incurred in respect of the transaction of goods sold can be measured reliably.

Revenue from rendering of services

Revenue from rendering of services is recognised when the outcome of that transaction can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, each period's revenue should be recognised by reference to the stage of completion at the balance sheet date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The stage of completion of the transaction at the balance sheet date can be measured reliably;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

The stage of completion of a transaction may be determined by surveys of work completed method.

Principles of revenue recognition from financial income: Revenue arising from interest, dividends, distributed profits and other financial incomes is recognized when the following two (2) conditions are satisfied simultaneously:

- It is probable to get economic benefits from the transaction;
- The revenue can be measured reliably.

Principles of revenue recognition from other income

This account is used to record other income, revenues not from operating activity of business:

NOTES TO THE SEPARATE FINANCIAL STATEMENTS*(Currency unit is represented by VND unless it is noted by other currency)*

revenues from transferring, liquidating fixed assets; collecting contractual fine from customer; Collecting compensation of third parties in order to make up lost assets; collecting doubtful debts which have been written off; collecting doubtful debts which have been written off; revenues in cash or in kind from gifts donated by organization individuals; etc.

5.12. Recognition of cost of goods sold

Cost of goods sold record cost of goods, products, services, investment property, costs of production of construction products which are sold during the period and costs relating to business of investment property, etc.

For the value of inventory lost, accountants must account immediately into the cost price of goods sold after deducting compensation (if any).

For the cost of direct materials consumed in excess of normal level, labor costs, fixed manufacturing overhead costs not allocated to the value of products in stock, accountants must account into the cost price of goods sold after deducting compensation (if any) even if products, goods have not been determined to be consumed.

5.13. Recognition of financial expenses

Recognition of financial expenses:

- Expenses or losses relating to financial investment activities;
- The cost of lending and borrowing;
- Loss due to foreign exchange differences arising from transactions relating to foreign currencies;
- Provision for decline in value of trading securities.

The above items are recorded by the total amount arising within the period without compensation to financial revenue.

5.14. Recognition of selling expenses, general administration expenses

Selling expenses is used to record expenses actually incurred in process of selling products, goods, providing services.

General administration expenses is used to record overhead costs of business including salary expenses of business' administrative staffs, such as salary social insurance, medical insurance, labor union expenses, unemployment insurance of administrative staff; expenses of office materials; labor instruments; depreciation of fixed assets used for administration, lease rent, licence tax, provision for bad debts; outsourced services; other cash expenses.

5.15. Recognition of current corporate income tax expense, deferred corporate income tax expenses

Current corporate income tax expense is determined based on taxable profit and corporate income tax rate applied in the current year.

Deferred income tax expense is calculated basing on deductible temporary differences, taxable temporary differences and income tax rate.

5.16. Financial instruments**Financial assets**

NOTES TO THE SEPARATE FINANCIAL STATEMENTS*(Currency unit is represented by VND unless it is noted by other currency)*

According to the Circular No. 210/2009/TT-BTC dated 06 November 2009, the Company classifies financial assets as below:

- Financial assets which are classified at fair value through the Income Statement are a financial asset held for trading or classified into fair value group through the Income statement at the initial recognition;
- Held-to-maturity investments are non-derivative financial assets, including fixed or determinable payments, and fixed maturity which the Company is willing and able to hold till maturity date;
- Loans and receivables are the non-derivative financial assets, including fixed or determinable payments, and non-listed in an listed market;
- Financial assets available for sale are non-derivative financial assets which are determined as available for sale or not classified in any of the other categories. These assets are measured at fair value through the Income statement, including held-to-maturity investment, loans and receivables. The classification of these financial assets depends on the purpose and nature of financial assets and is determined at the initial recognition.

The financial assets of the Company include cash and short-term deposits, receivables, other receivables, loans and listed and non-listed financial instruments.

The financial assets are recognized at the acquisition date and stopped being recognized at the selling date. All financial assets are initially recognized at cost plus directly attributable costs relevant to the issue and purchase.

Financial liabilities and owner's equity instruments

Financial instruments are classified as financial liabilities or owner's equity instruments at the initial recognition in accordance with their natures and definitions.

According to the Circular No. 210/2009/TT-BTC dated 06 November 2009, the Company classifies financial liabilities as below:

- Financial liabilities which are recognized at fair value through the Income Statement are held for trading or classified in fair value group through the Income Statement at the initial recognition;
- Financial liabilities are determined by its allocated cost is determined by the value of the initial recognition minus the original repayment, plus or minus the accumulative allocations by the actual interest rate method of the difference between the initial recognition value and maturity value, subtract deductions (directly or through the use of a provision account) cause of reducing the value or irrecoverableness.

The classification of financial liabilities depends on the purpose and nature of the financial assets and is determined at initial recognition.

The financial liabilities of the Company include payables, other payables, borrowings and debts.

All financial liabilities are initially recognized at cost plus directly attributable transaction costs.

Owner's equity instrument: A contract demonstrates the remaining value of Company's assets after deducting all obligations.

Offsetting of financial instruments: Financial assets and financial liabilities are offset with each other and presented net amount on the Balance Sheet if and only if the Company has a legal right to offset the recognised amounts and an intention to settle on a net basis, or to recognise the assets and settle the liabilities simultaneously.
